

#### Cautionary Disclaimer

#### FORWARD LOOKING STATEMENTS

Certain statements contained herein regarding First Majestic Silver Corp. (the "Company") and its operations constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation concerning the business, operations and financial performance and condition of First Majestic Silver Corp. Forward-looking statements include, but are not limited to, statements with respect to the future price of silver and other metals, the global supply and market for precious metals, revenue, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the timing and amount of estimated future production, recovery rates, costs of production, capital expenditures, costs and timing of the development of new deposits, exploration programs, the timing and payment of dividends, timing and possible outcome of pending litigation,. Assumptions may prove to be incorrect and actual results may differ materially from those anticipated. Consequently, guidance cannot be guaranteed. As such, investors are cautioned not to place undue reliance upon guidance and forward-looking statements as there can be no assurance that the plans, assumptions or expectations upon which they are placed will occur.

Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect, "is expected, "budget, "scheduled," "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward looking statements, including but not limited to: risks related to the integration of acquisitions; risks related to international operations; risks related to joint venture operations; actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, changes in national and local government, legislation, taxation, controls, regulations and political or economic developments; operating or technical difficulties in connection with mining or development activities; risks and hazards associated with the business of mineral exploration, development and mining (including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding); risks relating to the credit worthiness or financial condition of suppliers, refiners and other parties with whom the Company does business; inability to obtain adequate insurance to cover risks and hazards; and the presence of laws and regulations that may impose restrictions on mining, including those currently enacted in Mexico; employee relations; relationships with and claims by local communities and indigenous populations; availability and increasing costs associated with mining inputs and labour; the speculative nature of mineral exploration and development, including the risks of obtaining necessary licenses, permits and approvals from government authorities; diminishing quantities or grades of mineral reserves as properties are mined; the Company's title to properties as well as those factors discussed in the section entitled "Description of the Business - Risk Factors" in First Majestic Silver Corp.'s Annual Information Form for the year ended December 31, 2020, available on www.sedar.com, and Form 40-F on file with the United States Securities and Exchange Commission in Washington, D.C. Although First Majestic Silver Corp. has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. First Majestic Silver Corp. does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.

Resource and production goals and forecasts may be based on data insufficient to support them. Ramon Mendoza Reyes, P. Eng., Vice President of Technical Services is the certified Qualified Persons ("QP") for the Company. The Company expressly disclaims any obligation to update any "forward-looking statements".

## SILVER BASICS

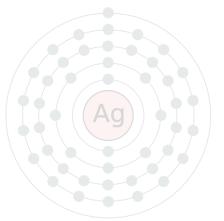

- Annual silver consumption is ~1.1B ounces
- 80% sourced from mining, 20% sourced from recycling
- Over past 10 years, the silver industry has been in a 500M ounce physical deficit
- Silver is one of the world's most reflective and best conductors of electricity
- 52% of silver consumption is from industrial applications electronics, medicine, solar, water purification, window manufacturing, etc.
- Demand by sector: 52% industrial fabrication, 25% coins & bars, 18% jewelry, 5% silverware
- Current silver to gold mine supply ratio: 7:1

Source: WTWH Media, www.eeworldonline.com/componenets-corner-gas-or-gauss/

# SILVER IS THE ENABLER...

#### GROWING DEMAND FROM SOLAR

#### **Annual Silver Demand for Photovoltaic Solar Panels**

- Solar carports are one of the most viable options for refueling EV's
- Currently in use at a number of Walmart's, Federal & State offices and colleges across the United States
- US Department of Energy's National Renewable Energy Laboratory (NRLE) says about 8,000 solar carport stations would be needed to provide a minimum level of urban and rural coverage nationwide

<sup>\*</sup>Certain amounts shown may not add exactly to the total amount due to rounding differences.

<sup>\*</sup>Cash Costs and AISC are non-GAAP measures. Consolidated AISC includes Corporate General & Administrative cost estimates and non-cash costs of \$1.49 to \$1.67 per payable silver equivalent ounce.

<sup>\*</sup>Metal price & FX assumptions for calculating equivalents are silver: \$22.50/oz, gold: \$1,750/oz, 20:1 MXN:USD

## ALL-IN SUSTAINING COST REDUCTIONS IN 2022E

<sup>\*</sup>Cash Costs and AISC are non-GAAP measures

<sup>\*</sup>AISC includes Corporate General & Administrative cost estimates and non-cash costs per payable silver equivalent ounce

<sup>\*</sup>Metal price & FX assumptions for calculating equivalents in 2022E are silver: \$22.50/oz, gold: \$1,750/oz, 20:1 MXN:USD

<sup>\*</sup>Quarterly forward projections are based on the Company's FY 2022E cost guidance of between \$12.20 to \$12.94 per AgEq for cash costs and \$16.79 to \$18.06 per AgEq for AISC

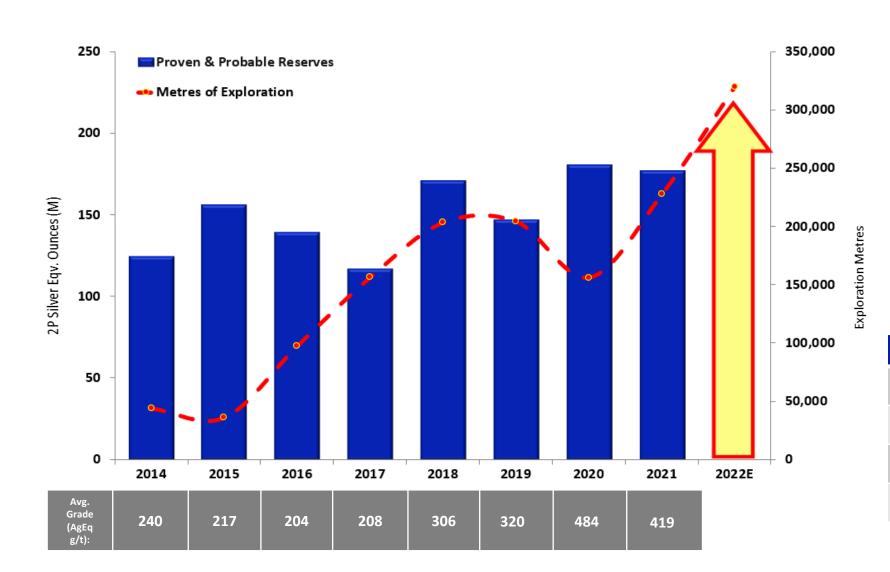

## CAPITAL INVESTMENTS

# RESERVE GROWTH

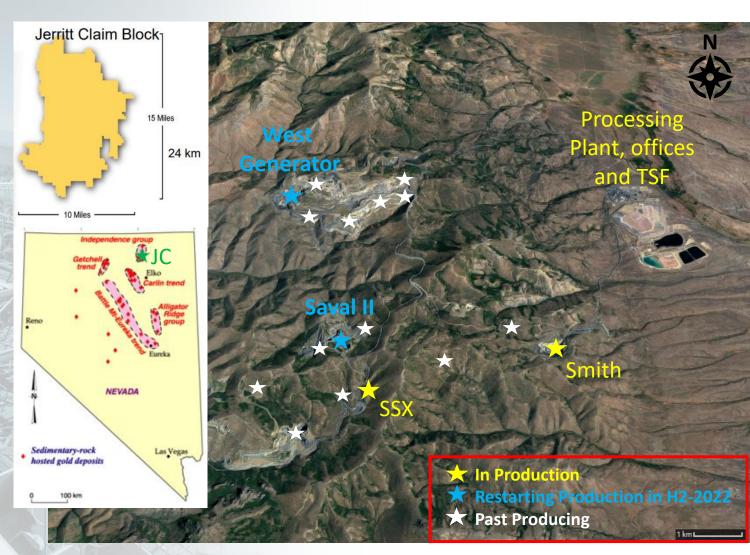

29 Drill rigs currently active across the Company

# Drill Rigs	Surface	Underground
San Dimas	1	10
Jerritt Canyon	2	9
Santa Elena	3	2
La Encantada	1	1

# JERRITT CANYON OVERVIEW

- Located in Elko County, Nevada
- Deposit discovered in 1972 and has been in production since 1981
- Produced over 10.0 Moz gold in 40-year production history
- Production currently comes from two underground areas (SSX and Smith)
- Rehabilitating the West Generator & Saval II underground mines with increased throughputs and grades anticipated in H2 2022
- The operation includes one of only three permitted roasters in Nevada to recover gold
- Processing plant has the capacity of 4,000 tpd; currently averaging 2,500 tpd
- Property consists of large, under explored land package consisting of 30,821 hectares (119 square miles)

# JERRITT CANYON GOLD MINE

- Brought in new site management consisting of 24 high-performance individuals
- Invested \$15M in capital projects in Q3 2021 including roaster upgrades and tailings expansion lift which temporarily increased AISC
- Restarting the West Generation & Saval II underground mines in H2 2022 which is expected to increase production and reduce AISC

#### **2022E Operational Highlights**

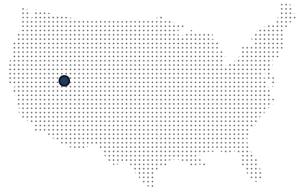

Mill Throughput: 2,500 tpd

2022E Production: 116,000 – 129,000 Au oz

(9.0M - 10.0M AgEq oz)

2022E AISC: \$1,503 - \$1,607

Produces: 100% Doré

		Full Year		
	Q1 2022	Q4 2021	Q3 2021	2021*
Gold production (oz)	20,707	23,660	26,145	68,567
Gold grade (g/t)	3.39	3.41	4.19	3.84
Cash costs / oz (\$US)	\$2,120	\$1,674	\$1,735	\$1,624
All-in Sustaining cost / oz (\$US)	\$2,488	\$2,077	\$2,286	\$2,048

\*Full Year results from April 30 to December 31 16

## SIGNIFICANT UPSIDE POTENTIAL

- Increase mining rates to fill capacity of processing plant
- Ability to create value through significant underground operating experience
- Near-term brownfield potential between the SSX and Smith
- Exceptional exploration potential property wide
- Potential of open pit pushbacks for future mill feed
- Open to ore purchase agreements with third parties to fill roaster excess capacity
- Improvements in metallurgical recoveries through fine grinding and other R&D

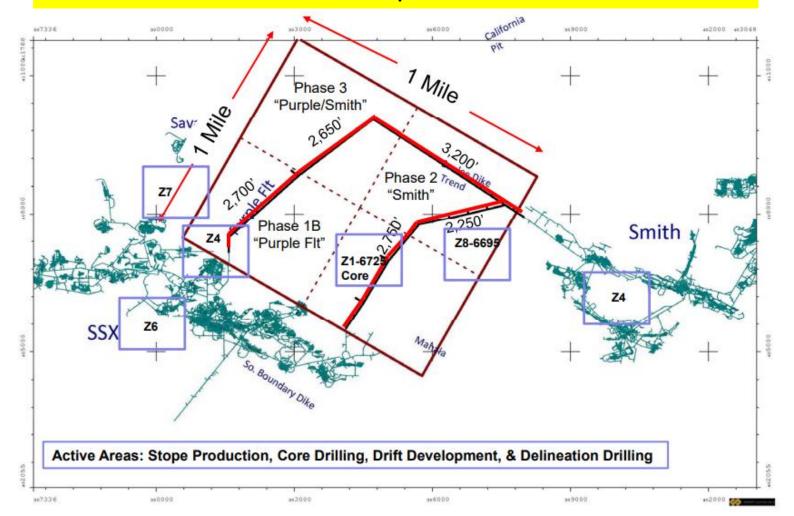

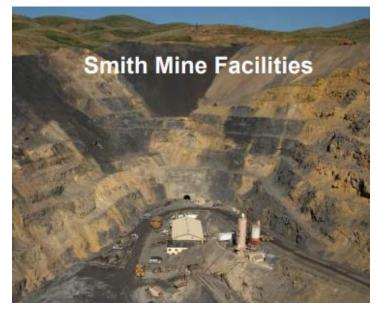

### CONNECTING SSX & SMITH MINES

#### **Connection drift was completed at the end of 2021**

## 2022 EXPLORATION PROGRAM

#### Approximately **135,000 metres** of exploration drilling planned to test over **25** high-priority targets

Murray to West Gen: Expand on Winters Creek: Vector off 13.7m of 11.0 g/t Au estimated 70,000 Oz Au resource Bidart: Vector off 6.1m of 3.26 g/t Au Murray: 1.25M ounces Au mined. ## SAN DIMAS SILVER / GOLD MINE

- Over 50% of the power requirements provided by environmentally clean, low-cost hydroelectric power
- Potential to expand hydroelectric dam in order to supply ~100% power to the operation and town
- Stope preparation and ventilation work under way at the Perez Vein in anticipation of initial production in H2 2022

#### **2022E Operational Highlights**

Mill Throughput: 2,400 tpd

2022E Production: 7.4M – 8.2M Ag oz

(13.7M – 15.2M AgEq oz):

2022E AISC: \$11.75 - \$12.65

Produces: 100% Doré

All-in Sustaining cost / oz (\$US)

\$12.98

\$11.29

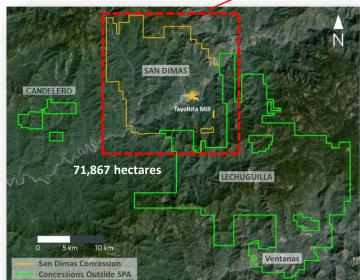

\$14.31

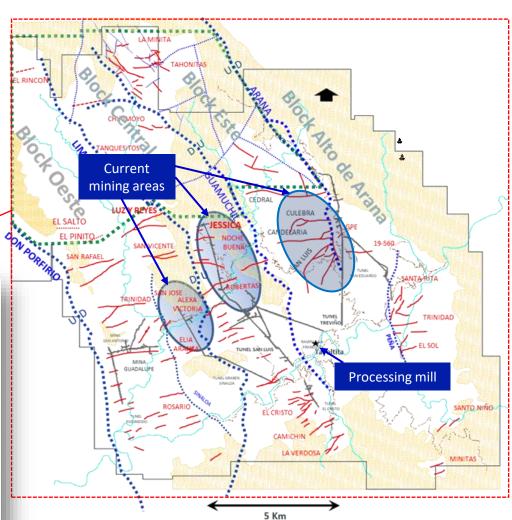

\$12.70

## SAN DIMAS REGIONAL MAP

- First reported mining in the San Dimas district in 1757 – over 250 years ago
- Considered to be one of the most significant precious metal mining districts in Mexico
- Historic production estimated at 11M Au oz & 580M Ag oz
- Over 500 km of underground development

Tayoltita Portal and Rail Restoration

## LA ENCANTADA SILVER MINE

#### **2022E Operational Highlights**

Mill Throughput: 2,900 tpd

2022E Production: 2.9M – 3.2M Ag oz

2022E AISC: \$17.89 - \$19.15

Produces: 100% Doré

- Natural gas generators currently supplying 90% of power requirements
- Achieving higher recoveries with recent changes made to milling operations and improved ore production from caving
- Developing access into the Ojuelas & Milagros Breccia deposits which contains higher silver grades for initial ore extraction in H2 2022

		Full Year		
	Q1 2022	Q1 2022 Q4 2021		2021
Silver production (oz)	644,009	757,586	738,354	3,241,555
Silver eqv. production (oz)	651,875	768,796	745,018	3,274,798
Silver grade (g/t)	108	117	131	130
Cash costs / oz (\$US)	\$16.41	\$14.51	\$13.77	\$13.49
All-in Sustaining cost / oz (\$US)	\$19.63	\$19.41	\$16.30	\$16.66

## SANTA ELENA SILVER/GOLD MINE

- Latin America's first successful HIG mill installation which processes hardrock, run of mine ore to improve recoveries
- Upgrading the LNG facility with four additional generators, increasing power capacity to support the Ermitaño mine (expanding to 24MW from 14 MW)
- Certified ISO 9001 Assay Lab on site, increasing reliability as well as reducing costs and allowing for faster assay turnaround times
- Installing dual-circuit process in 2022 for finer grinding (30 microns) and improve recoveries

#### **2022E Operational Highlights**

Mill Throughput: 2,600 tpd

2022E Production: 1.9M – 2.1M Ag oz

(6.6M - 7.4M AgEq oz)

2022E AISC: \$15.58 - \$16.66

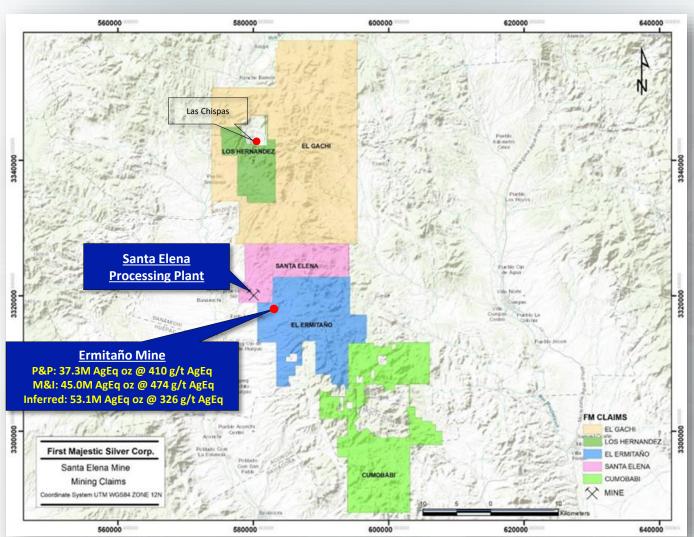

Produces: 100% Doré

		Full Year		
	Q1 2022	Q4 2021	Q1 2021	2021
Silver production (oz)	337,201	426,870	453,528	1,954,492
Silver eqv. production (oz)	1,868,787	1,955,550	884,332	5,041,937
Silver grade (g/t)	68	72	82	77
Gold grade (g/t)	3.30	2.97	1.11	1.58
Cash costs / oz (\$US)	\$12.96	\$11.56	\$20.18	\$15.40
All-in Sustaining cost / oz (\$US)	\$16.31	\$14.02	\$25.66	\$19.20

## REGIONAL POTENTIAL

-For full Mineral Resource details, please refer to the 2020 Santa Elena Silver/Gold Mine NI 43-101 Technical Report

Vein Outcropping at Ermitaño

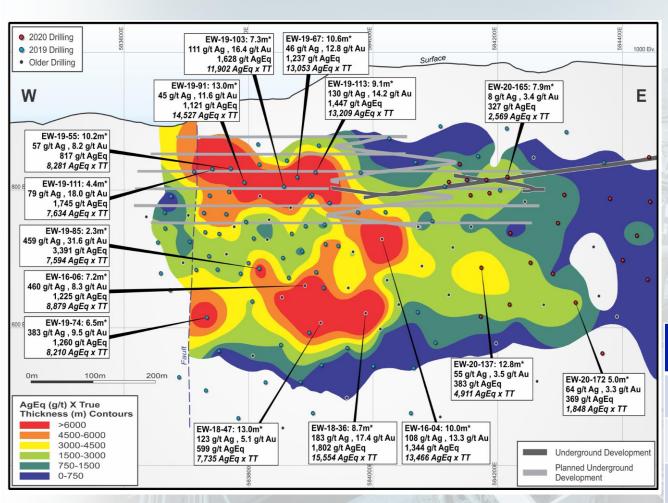

#### **Exploration Upside**

- Large land package of mining claims covering 102,244 hectares
- New discovery made at Ermitaño in late 2016
- Identified multiple prospective veins within a 5Km radius of the processing plant and planning to drill test in Q3 2022

## SANTA ELENA'S ERMITAÑO MINE

• Hole 16-04: 9.9 metres grading 1,209 g/t AgEq • Hole 18-47: 13.0 metres grading 547 g/t AgEq • Hole 19-91: 13.0 metres grading 1,003 g/t AgEq

- Not subject to Sandstorm stream
- Completed 30,300 metres of drilling in 2021
- Production to ramp up 2022 2023
- PFS released in November 2021

Inaugural doré pour from Ermitaño

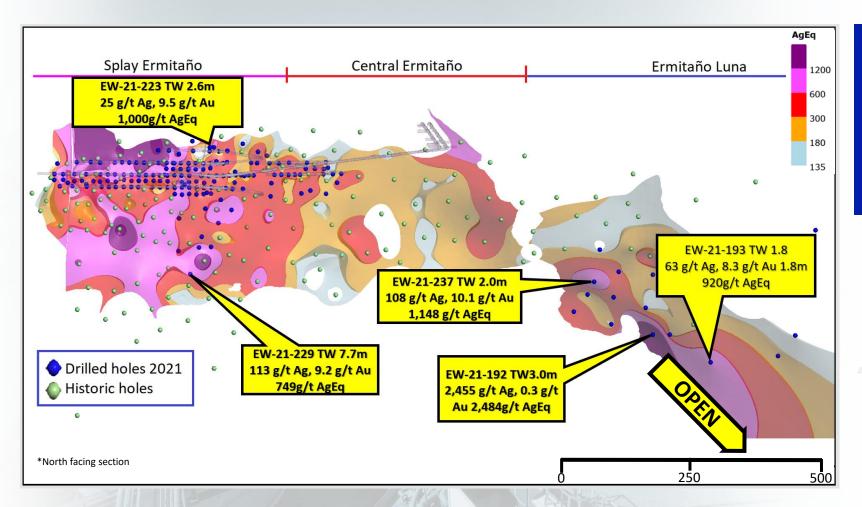

East & West Portals

Category	Tonnes (k)	Ag (g/t)	Au (g/t)	Ag-Eq (g/t)	Ag (M oz)	Au (k oz)	Ag-Eq (M oz)

Inferred	5,072	64	2.70	326	10.6	440	53.1

Measured & Indicated Resources are inclusive of Mineral Reserves

# RESOURCE EXPANSION AT ERMITAÑO

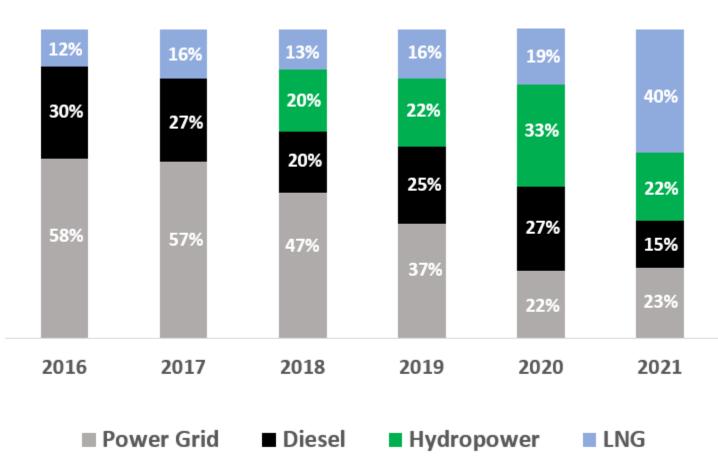

- Planning to drill ~30,000 metres in 2022 to expand the existing resource
- System remains open to the East and at depth
- Potential for look-alike deposit at Ermitaño Luna

### GOING GREEN IS GOOD

- Over the last five years, the Company has focused on reducing its consumption of fossil fuels, like diesel and electricity supplied to the grid by coal burning power plants
- In 2016, the La Encantada operation was converted from diesel to clean burning liquefied natural gas "LNG"
- In 2018, hydropower was introduced when the Company purchased the San Dimas mine. The operation and town of Tayoltita source ~50% of their power supply from low-cost, hydro electric power
- In 2021, the Santa Elena operation was converted from diesel to LNG

#### Energy Sources at Our MEX Operations

<sup>\*</sup> Excludes Jerritt Canyon

<sup>\*</sup> Amounts calcualted based on kWh

## **FUTURE CATALYSTS**

- Production ramp up at Santa Elena's Ermitaño Mine in 2022 (1,000 tpd) and 2023 (2,000 tpd)
- Unlocking value at Jerritt Canyon through increased exploration and development rates to increase production and lower costs
- Rehabilitating the West Generator & Saval II underground mines at Jerritt Canyon with increased throughputs and grades anticipated in H2 2022
- Dual-circuit commissioning at Santa Elena processing plant to increase metallurgical recoveries from Ermitaño
- Continued Resource expansion potential at Santa Elena's Ermitaño Mine
- Continued improvements in metallurgical recoveries through implementation of microbubbles, fine grinding & other R&D
- Higher Silver Prices!!

Santa Elena's LNG Power Plant

## DIVIDEND POLICY

Under the Company's dividend policy, the quarterly dividend per common share is targeted to equal approximately **1% of the Company's revenues**.

The Q1 2022 cash dividend of \$0.006 per share will be paid to holders of record of First Majestic as of the close of business on May 25, 2022 and will be distributed on or about June 10, 2022.

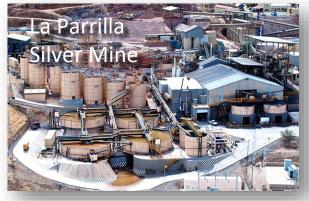

## TEN RULES OF SILVER

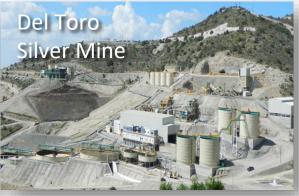

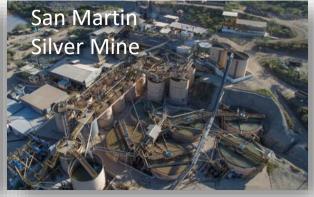

- 1. Silver is real money
- 2. Physical silver is a hard asset
- 3. Silver is relatively inexpensive
- 4. Silver isn't just cheaper to buy, but it can be more practical when you need to sell, too
- 5. Silver outperforms gold in bull markets
- 6. Silver inventories are falling
- 7. Industrial use is growing
- 8. New supply is falling
- 9. World demand is growing
- 10. The gold/silver ratio favours silver

### **NON-CORE ASSETS**

- · Located in Durango, Mexico
- Dual-circuit processing facility consisting of a 1,000 tpd cyanidation circuit and a 1,000 tpd flotation circuit
- District land package of mining concessions totaling 69,748 hectares

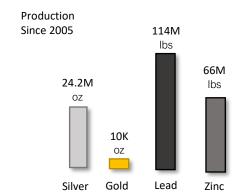

- · Located in Zacatecas, Mexico
- Property consists of 70 mining claims covering 2,159 hectares
- 1,000 tpd flotation circuit capable of producing lead-silver and zinc concentrates
- · Located in Jalisco, Mexico
- 100% Silver/Gold doré producer
- Property consists of 33 mining claims within 38,512 hectares

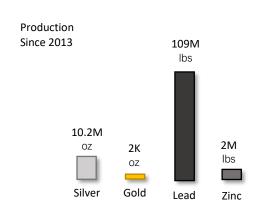

39K

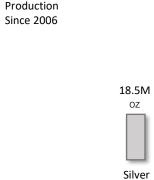

Gold

• 1,300 tpd cyanidation mill

- Located in the State of Mexico, Mexico
- District land package of mining concessions totaling 39,714 hectares
- 500 tpd flotation circuit capable of producing a silver/gold concentrate

## MEXICO TAX DISPUTE

#### BACKGROUND

- Primero Mining Corp. ("PEM"), now a subsidiary of First Majestic, acquired the San Dimas mine in 2010 and at the time had a Silver Purchase Agreement that required PEM to sell 100% of the silver produced to Wheaton Precious Metals Corp., up to 6 million ounces and 50% of silver produced thereafter, at the lower of: (i) the spot market price or (ii) \$4.04 per ounce plus an annual increase of 1%.
- In 2012, PEM applied for and received an Advance Pricing Agreement ("APA") from Servicio de Administracion Tributaria ("SAT") which gave PEM assurance and tax certainty that SAT would accept the realized selling price of silver to which taxes were to be calculated. Under Mexican tax law, an APA is generally applicable for a five-year period and this ruling was made effective for the period of 2010 to 2014.
- In 2016, PEM received a legal claim from the SAT seeking to nullify the APA. The legal claim initiated does not identify any different basis for paying taxes.

#### **OUR POSITION**

The Company continues to vigorously defend the validity of the APA and its transfer pricing position through the applicable provisions of three separate International double taxation treaties.

#### LEGAL **UPDATES**

- On May 13, 2020, the Company served the Government of Mexico with a Notice of Intent to Submit a Claim under the provisions of Chapter 11 of North American Free Trade Agreement.
- On November 12, 2020, the Company received the written decision made on September 23, 2020 by the Federal Court nullifying the APA. SAT has been directed to re-examine the evidence and basis for the issuance of the APA with retroactive effect, for the following reasons (i) SAT's errors in analyzing PEM's request for the APA and the evidence provided in support of the request; and (ii) SAT's failure to request from PEM certain additional information before issuing the APA. Upon review the Company's legal advisors are of the opinion that the decision is flawed and intends to appeal the decision to the Circuit Courts.
- On March 2, 2021, the Company announced that it has submitted a Request for Arbitration to the International Centre for Settlement of Investment Disputes ("ICSID"), on its own behalf and on behalf of Primero Minera S.A de C.V. ("PEM") its subsidiary in Mexico, based on Chapter 11 of the North American Free Trade Agreement ("NAFTA").
- Following the appointment of all three NAFTA Panel members in August, the first session of the NAFTA Arbitration was held by videoconference on September 24, 2021 resulting in the issuance of the first order setting out the procedural rules which will govern the proceedings.

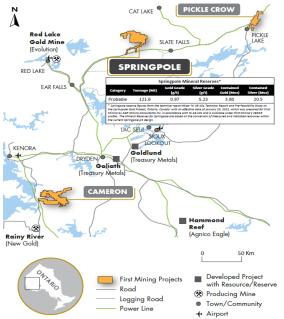

FSE | FMV

## SPRINGPOLE SILVER STREAM

- In June 2020, entered into a silver stream agreement to purchase 50% of the silver produced from the Springpole Project, located in Ontario, Canada
- Ongoing cash payments of 33% of the silver spot price per ounce, up to a maximum of \$7.50 per ounce
- Total consideration of \$22.5 million in cash and shares over three milestone payments
- Approximately 18.1 million payable ounces of silver expected to be produced over the life of mine (50% payable to FMS)
- Provides significant upside potential to higher silver prices
- Substantial exploration upside over the large land holdings of 41,913 hectares

(1) Mineral Reserves have been classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards on Mineral Resources and Mineral Reserves, whose definitions are incorporated by reference into NI 43-101.

(2) The Mineral Reserve statement provided in the table above have an effective date of December 31, 2021. The Mineral Reserve estimates were prepared under the supervision of Ramón Mendoza Reyes, PEng, and a Qualified Person ("QP") for the purposes of NI 43-101 who has the appropriate relevant qualifications, and experience in mining and mineral reserves estimation.

(3) The Mineral Reserves were estimated from the Measured and Indicated portions of the Mineral Resource estimate. Inferred Mineral Resources were not considered to be converted into Mineral Reserves.

(4) Silver-equivalent grade (Ag-Eq) is estimated considering metal price assumptions, metallurgical recovery for the corresponding mineral type/mineral process and the metal payable of the selling contract.

(a) The Ag-Eq grade formula used was:

Ag-Eq Grade = Ag Grade + Au Grade \* (Au Recovery \* Au Payable \* Au Price) / (Ag Recovery \* Ag Payable \* Ag Price).

(b) Metal prices considered for Mineral Reserves estimates were \$22.50/oz Ag and \$1,750/oz Au for all sites. The silver-equivalent factor used for Jerritt Canyon was 77.8 g/t Ag-Eq per 1 g/t Au.

(c) Other key assumptions and parameters include: metallurgical recoveries; metal payable terms; direct mining costs, processing costs, indirect and G&A costs and sustaining costs. These parameters are different for each mine and mining method assumed and are presented in each mine section of the 2021 AIF. (5) A two-step constraining approach has been implemented to estimate reserves for each mining method in use: A General Cut-Off Grade (GC) was used to delimit new mining areas that will require development of access, infrastructure and all sustaining costs. A second Incremental Cut-Off Grade (IC) was considered to include adjacent mineralized material which recoverable value pays for all associated costs, including but not limited to the variable cost of mining and processing, indirect costs, treatment, administration costs and plant sustaining costs but excludes the access development assumed to be covered by the block above the GC grade.

The cut-off grades, metallurgical recoveries, payable terms and modifying factors used to convert Mineral Reserves from Mineral Resources are different for all mines and are presented in each mine section in the AIF for San Dimas and La Encantada, in the April 2021 Technical Report for Jerritt Canyon and in the November 2021 Technical Report for Santa Elena.

(6) Modifying factors for conversion of resources to reserves include consideration for planned dilution which is based on spacial and geotechnical aspects of the designed stopes and economic zones, additional dilution consideration due to unplanned events, materials handling and other operating aspects, and mining recovery factors. Mineable shapes were used as geometric constraints.

(7) Tonnage is expressed in thousands of tonnes; metal content is expressed in thousands of ounces. Metal prices and costs are expressed in USD.

(8) Numbers have been rounded as required by reporting guidelines. Totals may not sum due to rounding.

(9) The technical reports from which the above-mentioned information is derived are cited under the heading "Technical Reports for Material Properties" in the 2021 AIF.

- (1) Mineral Resource estimates have been classified in accordance with the 2014 Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards on Mineral Resources and Mineral Reserves, whose definitions are incorporated by reference into National Instrument NI 43-101. (2) The Mineral Resource estimates provided above have an effective date of December 31, 2021. The estimates were prepared by FMS Internal QPs, who have the appropriate relevant qualifications, and experience in geology and resource estimation. The information provided was compiled by David Rowe, CPG, Internal QP for First Majestic, and reviewed by Ramon Mendoza Reyes, P.Eng., Internal QP for First Majestic. (3) Sample data was collected through a cut-off date of December 31, 2021, for the Material Properties. All properties account for relevant technical information and mining depletion through December 31, 2021.
- (4) Metal prices considered for Mineral Resources estimates were \$25.00/oz Ag and \$1,800/oz Au.
- (5) Silver-equivalent grade is estimated considering: metal price assumptions, metallurgical recovery for the corresponding mineral type/mineral process and the metal payable of the corresponding contract of each mine. Estimation details are listed in each mine section of the Annual Information Form (AIF).
- (6) The cut-off grades and cut-off values used to report Mineral Resources are different for all mines. The cut-off grades, values and economic parameters are listed in the applicable section describing each mine section of the AIF.
- (7) Measured and Indicated Mineral Resource estimates are inclusive of the Mineral Reserve estimates.
- (8) Tonnage is expressed in thousands of tonnes, metal content is expressed in thousands of ounces. Totals may not add up due to rounding.
- (9) The technical reports from which the above-mentioned information for the material properties is derived are cited under the heading "Technical Reports for Material Properties" of the AIF.
